**Frameworks and Libraries:** Node.js, Express.js, React.js, NPM, Ionic, Angular, Bootstrap

**Technologies:** VS/VS Code, XCode, Eclipse, AWS, Git/GitHub, Unix Command Line, Netlify, Heroku, MS Office

### **PROFESSIONAL EXPERIENCE**

#### **Best Buy**

**Staten Island, NY**

*Mobile and Activations Expert*

*March 2020 – Present*

Sales Advisor with an expertise in mobile devices and activations among numerous carriers, working to provide excellent customer service along with clear and concise guidance for a guest's devices.

- Demonstrate or explain products, methods, or services to persuade customers to purchase products or use services and making personally tailored recommendations to provide the best solution to modern problems.
- Perform mobile device activations, set-ups, and transfers after receiving payment by cash, check, credit cards or vouchers.

#### **Parc Vendome Condominiums via AKAM Associates**

**New York, NY**

*Management Assistant*

*August 2019 – January 2020*

Worked in coordination with a management team from AKAM Associates to manage condominium complex of four buildings to provide a simple and enriched residential experience.

- Performed data entry for arrears billing, tax audits, and rental rates and oversaw the creation and posting of building notices in coordination with several ongoing construction projects and building events.
- Performed daily correspondence with building residents and on- and off-site contractors regarding billing, appointments, and IT inquiries utilizing the BuildingLink Management Systems

#### **Blaze Pizza**

**Staten Island, NY**

*Team Member to Shift Supervisor*

*October 2017 – August 2019*

Directed and coordinated the activities of employees in cooperation with the general manager in order to provide quick and excellent food service to guests seeking a modern dining experience.

- Conduct employee training in work and safety procedures with a goal of having employees fully engaged in the production and processing in food items.
- Logging in Shift Summaries and cash/debit/credit totals into Microsoft Excel and CTUIT Radar Management systems in order to maintain an orderly business structure.

### **TECHNICAL PROJECTS**

#### **TTP Residency Full Stack Web Development Bootcamp**

**New York, NY**

*Tech Talent Pipeline (TTP): Software Development Student*

*January 2022 – February 2022*

Participated in a full-stack web development bootcamp which covered various topics including React.js, Node.js, Express.js, PostgreSQL, Sequelize, and Redux, culminating in a capstone technical project.

- Used React.js to render a web- and mobile-friendly course management system similar to CUNY's Blackboard system.
- Utilized bootstrap and bootstrap themes to create a fluid and dynamic front-end compatible on all device sizes.
- Created a complex database management system to store information on assignments, courses, students, and staff utilizing Express and PostgreSQL to create HTTP requests to connect the frontend and backend of the application.

#### **Develop For Good: The Pathway Initiative**

**Stanford, CA**

*Front-End Development Volunteer*

*January 2022 – Present*

Volunteering for a non-profit organization working for The Pathway Initiative to deliver a fully complete mobile application with a goal of connecting minority and underprivileged high school and college students to mentors in medicine and health science fields.

- Utilizing React Native and Amazon Web Services to launch a completed mobile application on the App and Play Stores.
- Utilizing Expo to create developer builds while debugging and altering front-end designs.

### **VOLUNTEER AND LEADERSHIP EXPERIENCE**
